Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a method for isolating a protein molecule or population of peptide molecule and product and/or composition thereof, classified in classes 435 and 530, subclasses 183 and 417, respectively.
 - II. Claims 21-37, drawn to an apparatus for extracting and isolating protein or peptide molecule and a kit formulation thereof, classified in class 435, subclasses 283.1 and 810

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as the use of a manual centrifuge by hand for separating or extracting or isolating the protein and/or peptide of interest without a support matrix use of an apparatus comprising one or more supports (e.g., polyester, polyolefin, silica, polyethylene, polycarbonate and the like) for separating or extracting or isolating protein and/or peptide molecule of interest.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the searches for the individual groups are not coextensive, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. A telephone call was made to Robert W. Esmond on 8/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion and future correspondence

7. Claims 1-37 is subject to restriction requirement.
